

PERSEIDS

Idea

Captures audio into up to five **Trails**, then builds a stereo **sound cloud**: Spectra (stylized additive) blended with Swarm (grains), plus Resonator, Filter, Reverb, Pan Drift and Crossfade.

Multi Dry/Wet balances clean input vs. the finished cloud. Full wet = cloud only — dry is not fed into the FX.

Operation

- **Block pot** — open menu; turn edits (pickup). Clearer turn on another pot jumps Block→Block (anti-jitter).
- **Cycle short** — next parameter (also steps Multi). Not Home.
- **Cycle hold + pot** — scroll list (no edits); >4 params keep 4-wide columns.
- **Cycle long** — delete-all Trails (confirm).
- **Imprint short** — Play / Pause.
- **Rec** — manual capture (same Overwrite rules as Threshold).

Trail encoders ×5

- **Turn** — loudness of that Trail in the mix.
- **Short / Long** — Lock on Home; Home from menus; Solo anywhere (see Operation).

Home dashboard

Per Trail: level %, Lock (L), Solo (S), life bar. Crossfade: thin **focus ticks** beside T#. Header: **R1...R5 / REC1...REC5** (small type like CPU). Left: input VU + threshold.

Wandering Beams = rotating dots around **T#**. They show remaining **Hold** (Block 2 — how long the Trail stays before fade-out): long & fast = lots of Hold left; short & slow = almost gone; **INF** = full spin forever. Same story as the life-bar countdown. OLED CycleView: block name left, **n/m** top-right, value centered, bars + abbreviations (max 4 columns; extra params scroll).

- **Trail short on Home** — Lock.
- **Trail short in a menu** — Home (any of 5). Short again on Home = Lock.
- **Trail long** — Solo (any screen).
- **Multi long push** — Home.
- **Multi turn / Cycle short** — Dry/Wet & Multi menu.
- **Idle ~4 s** — auto Home (for calm reading).

Multi

DW · M1 · M2 · TU · SET		
PARAM	OLED	EXPECT
Dry/Wet	DW	Clean input ↔ full cloud.
Macro1/2	M1 M2	Reserved (not wired yet).
Time Unit	TU	Reserved — Sec/Clock later.
Settings	SET	Also CPU RAM SCL INT

PERSEIDS

1 TrailsP1

CNT · THR · CRE · OVR · ON

How many voices, when recording starts.

CountCNT

1–5; denser.

ThresholdTHR

Auto-rec sense.

Cont. RecCRE

OFF edge; ON while above.

OverwriteOVR

ON steal mid-Hold; OFF wait Empty.

On/OffON

Capture enable.

2 TimeP2

BUF · HLD · FIN · FOUT

Length, stay, breathe in/out.

BufferBUF

Max take ≤30 s.

HoldHLD

Stay; far right INF.

Fade InFIN

Soft attack / Play.

Fade OutFOUT

Soft release / Pause.

3 EnginesP3

BLD · PSP · PSW

Balance engines & pitch.

BlendBLD

Spectra ↔ Swarm.

Pitch SpPSP

±1 oct additive.

Pitch SwPSW

±1 oct grains.

4 SpectraP5

PAR · WSH · UMB · ENS

Stylized harmonic body.

PartialsPAR

Few = simple; more dense.

WaveshapeWSH

Sine · saw · fold.

UmbraUMB

Airy ↔ vocal.

EnsembleENS

Chorus / detune.

5 SwarmP4

SIZ · SPR · SCN · DIR · ATM

Granular half of the blend.

SizeSIZ

Short busy; long smear.

SpreadSPR

Stereo width.

ScanSCN

0 freeze; up scrub.

DirectionDIR

Fwd · Rev · Rnd.

AtmosphereATM

Blur ↔ Radiation.

6 ReverbP8

MIX · DEC · DMP · CHR

Space on the cloud — not dry.

MixMIX

How much hall.

DecayDEC

Tail length.

DampingDMP

Higher = darker.

CharacterCHR

Chorus ↔ Friction.

7 ResonatorP7

MIX · DEC · PIT · QNT

Pitched ring on Swarm.

Mix/DecMIXDEC

Amount / ring.

PitchPIT

Root ±1 oct.

QuantizedQNT

OFF harm.; ON SCL/INT.

8 Pan DriftP6

PHS · AMP · VEL

Trails wander L↔R alone.

PhasePHS

0 sync · 100 offset.

AmplitudeAMP

How far L↔R.

VelocityVEL

Speed; center still.

9 CrossfadeP9

AMP · VEL

Focus walks Trails (ticks beside T#).

AmplitudeAMP

0 equal · high spotlight.

VelocityVEL

Travel; center freeze.

10 FilterP10

CUT · RES · FBK · DST

Tone on wet — never dry.

CutoffCUT

Brightness.

ResonanceRES

Peak / whistle.

FeedbackFBK

Drive / growl.
